

Symptom-Free Pee: **LET IT BE**

A national initiative to stop inappropriate antibiotic use for asymptomatic bacteriuria in long-term care residents.

STOP

WAIT

GO

STOP treating asymptomatic bacteriuria; it is not an infection
STOP testing foul-smelling, dark, or cloudy urine

WAIT and rehydrate residents who develop changes in mental status, behaviour, or function without typical urinary tract infection symptoms

GO to urinalysis and urine culture if typical signs and symptoms of urinary tract infection are present
